Re: Draft FY-94/95 Site Management Plan (SMP)
Naval Weapons Station, Yorktown, Virginia

Dear Ms. Ellis:

Enclosed are two copies of the Draft FY-94/95 SMP for your review. This replaces the Preliminary Draft SMP submitted to you on 19 August 1993 for your review and comment. No formal written comments have been received to date on the Preliminary Draft SMP. However, we have incorporated all verbal comments made during our meeting on 10 September 1993 at EPA Region III's headquarters.

Our letter to EPA dated 1 December 1993 is enclosed which discusses the changes made to the revised SMP in more detail. Those comments should also apply to your letter of 1 July 1993 which forwarded your comments on the Draft Final Operable Unit (OU) Evaluation Report. Confirming our conversation, all Parties agreed that the OU Report was not necessary and no further action would be taken to finalize that document. Sites will be nominated as OUs as necessary when the remediation strategy has been determined and the Proposed Plan and Record of Decision are being prepared.

If you have any questions, please contact Mrs. Brenda R. Norton, P. E., at (804) 322-4778.

Sincerely,

N. M. JOHNSON, P.E.
Head, Installation Restoration
Section (North)
Environmental Programs Branch
Environmental Quality Division
By direction of the Commander
